Software Test Engineer

Objective

   To obtain a challenging position in enterprise application integration environment where technology integrates with business functionalities to enhance business process I look forward to the opportunities where I can use my analytical skills in combination with technical expertise to improve all phases of enterprise development, implementation, and maintenance.

Professional Summary

Work Experience on Manual Testing and Automation Testing:

- 5+ years of work experience as QA Automation Test Engineer.
- Good understanding of the STLC process – Requirement Analysis, Test case documentation,

   reviews.

- Experience in creating Test Case design, Test Scenarios and Defect Management to ensure

   Quality.

- Also, expertise in Functional Testing, Regression Testing, Sanity Testing, E2E Testing.
- Working knowledge of Agile methodologies.
- Writing the queries in MySQL Database.
- Verify the response xml output with various fields in application.
- Reporting the Defect and Documentation.
- Expertise in Automation Testing using Selenium WebDriver, TestNG and Maven build tool.
- Hands-on different automation framework like Hybrid framework using TestNG and POM, BDD Cucumber using POM and Maven, Data Driven Technique using POM.
- Integration of API (Request xml and response xml) with Selenium for Create, Update, Get, List and Close methods.
- Good knowledge with Selenium WebDriver using Java Script for performance testing.
- Good knowledge with API, Rest Assured.
- Good knowledge with Appium for mobile testing.
- To run multiple Test Cases for daily Sanity Testing.
- GitBash and GitHub over the time for upload/download projects with new features.
- Sound knowledge on Core Java extensively used for test case automation.
- Different Automation frameworks for Functional Regression and Daily Sanity Testing.
- Live Demonstration to Stake Holder before Release.

<u>Automation Testing Tools:</u>

- Selenium WebDriver with JAVA

<u>Test Management Tools :</u>

- JIRA

<u>DBMS :</u>

- SQL Server 2014

<u>Operating Systems :</u>

- Windows family, Linux .

<u>Languages :</u>

- JAVA, SQL, LINUX

Professional Experience

- Working as Software QA Analyst at **ProAzure Software Solutions Pvt.Ltd. from JUN-2018 to June-2022.**
- Working as Senior Test Engineer at **PIT Solutions Pvt. Ltd.** L7 & L8, Thejaswini, Technopark
Thiruvananthapuram. Kerala, Indian – 695581 Ph: +91 471 2700915 **from June-2022 to 30 Jan 2023.**
- Working as Software Test Engineer at **Alois Solutions.** 2nd Floor, Natubhai Center, Natubhai Cir, Natubhai Circle, Road, Vadodara, Gujarat 390007from **Aug-2023 to till date.**

Projects Handled

Project Name 02 : Capital Restructuring & Privatization (04/2019 to 06/2022)

Client   : Investec, UK
Technologies   : Selenium, JIRA
Domaim   :   Banking Domain

Description:

It provides clients with expert perspectives to help them make critical strategic and alternative investment decisions with confidence. It takes a multi-dimensional approach to problem-solving

and formulates effective solutions to address your needs and build highly effective solutions that help you create value.PWP is a leading global institutional asset manager with an unwavering focus on investors' needs.PWP created the Agility platform to provide user organization an Outsourced Investment Team with comprehensive capabilities that can offer customized programs to meet your individual investment requirements.

Responsibilities:

- Prepared Test Scenario, Test case design, and Review it.
- Understand the SRS doc and clarify the doubts with BA
- Performed Functionality Testing, Retesting and Regression Testing.
- Performed manual **functional testing** and constructed positive and negative test scenarios as per requirements. Involved in extensive backend testing using **SQL** Queries to retrieve the data from the database and checked data integrity.
- Performed **End-to-End testing manually** and was associated with **User Acceptance Testing.**
    - Testing on staging environment. Have good knowledge of working in project with AGILE model.
    - Understand the FRS document and analyses the requirement.
    - Prepare the test cases from use cases
    - Responsible for Smoke testing. Execute the test case to validate customer requirement
    - Involved in review test case and send review comments to colleagues.
    - Used **JAVA Selenium,** Used JAVA Selenium, Rest Assured and Appium.
    - Preparing daily report for the executions of the testcases
- Participate in scrum meeting to discuss about project progress report every day. Reporting the Regular status to the higher authorities in a timely manner.
- Involved in the Behavioral, Input Domain, Error Handling, Calculation, Base, And Service Level Coverage. Log the defect in JIRA.
- Participated in client Interaction.

Project Name 01   :   Modular CRM- and Billing system (06/2018 to 03/2019)

Client   :   Dimari, Germany

Technologies   :   SQL Server 2014,Linux, JIRA

The company caters to retail, manufacturing, energy and utilities, pharmacy, healthcare, and other sectors.

Roles and Responsibilities:

- **Analyzing & validating** the completeness of business requirements.
- Generating the **Test scenarios** and **Test cases**.
- Performed Manual as well as Automation **Validation, Retesting**, and **Smoke testing**.
- Selecting Test Cases for **Automation**,
  Used **JAVA Selenium,** Used JAVA Selenium, Rest Assured and Appium.
- Inspect Elements/ Objects,
- Involved in Web service testing using **RestAPI**
- Used **Rest API** Postman tool for Web service functionality testing,
- Good understanding of **Postman** in **API** Testing.
- Creating Test Cases using Element Locators and Selenium WebDriver Commands,
- Developed **Automation Test Scripts**
- Prepared **Test Evidence Doc**. **Test Summary Report**, **Assets Validation** Reports
- Managed SQL database on MySQL server
- **Reporting** the **Regular** status to the higher authorities in a timely manner
- Created **Risk & Issue log, Test Evidence, migration tracking report,**
- Participated in **Daily standup** & **Catchup meetings** with the team, and **weekly status meetings** with clients to discuss open issues and communicate with the onsite team.

Project Name 04 :   **Thanos (Axis Bank) (08/2023 to 04/2024)**

Client   :   Axis Bank

Technologies   :   Selenium java, JIRA, Agile, Appium, Mobile Testing

Domaim   :   Banking (Life Insurance Plan)

Description:

Ensure regular investment and security for life by purchasing a life insurance policy. Axis Bank, in partnership with Max Life Insurance, Bajaj Allianz Life Insurance, LIC of India and Tata AIA Life Insurance, offers a variety of solutions that combine savings and protection, for different life stages. Buy the right product now based on your needs and lead a stress-free life.

Roles and Responsibilities:

- Generating the Test scenarios and Test cases.
- Performed Manual as well as Automation Validation, Retesting, and Smoke testing.
- Selecting Test Cases for Automation,
- Used JAVA Selenium, Rest Assured and Appium
- Inspect Elements/ Objects.
- Creating Test Cases using Element Locators and Selenium Web Driver Commands,
- Developed Automation Test Scripts
- Prepared Test Evidence Doc. Test Summary Report, Assets Validation Reports
- Reporting the Regular status to the higher authorities in a timely manner
- Created Issue log, Test Evidence, tracking report,
- Extensive experience in building CI/CD pipelines using Jenkins for end-to-end automation for all builds and deployments.
- Participated in Daily standup meetings with the team, and weekly status meetings with clients to discuss open issues and communicate with the onsite team.

Academic Details
- BE from PUNE UNIVERSITY, In year 2015.
